Summary

Frontend-focused Full Stack Developer with professional experience building scalable web applications and SaaS platforms. Experienced in end-to-end project delivery, from requirement analysis and development to deployment and maintenance, with a focus on performance, user experience, and maintainable software architecture.

Skills

Frontend: React, Next.js, React Native, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, PostgreSQL, Directus, REST APIs

Languages: JavaScript (ES6+), TypeScript, Java and SQL(Fundamental Level)

Tools & Deployment: AWS EC2, Nginx, PM2, Docker, Git, Linux

Experience

Junior Software Developer — EWall Solutions Pvt. Ltd.

Aug 2025 – Present

- Developed and maintained production software applications using React, Next.js, TypeScript, Node.js and Express.js
- Built reusable UI components, custom hooks, and REST API integrations to accelerate feature development
- Implemented authentication, role-based access control, and state management for multi-tenant SaaS platforms
- Optimized application performance by reducing unnecessary re-renders using memoization, lazy loading, and code splitting, improving page load speed and responsiveness
- Deployed and maintained production applications on AWS EC2 using Nginx, PM2, SSL, and Linux

Software Developer Intern — EWall Solutions Pvt. Ltd.

May 2025 – Aug 2025

- Assisted in frontend development, API integration, and responsive UI implementation using React and TypeScript
- Contributed to backend customization, bug fixes, and reusable component development

Freelance Full Stack Developer (Part-time)

Nov 2024 – May 2025

- Delivered 6+ client projects including dashboards, business websites, and SaaS applications using React, Next.js, Node.js, and PostgreSQL for real-world business use cases
- Collaborated directly with clients to design, develop, deploy, and maintain full-stack products based on client requirements

Projects

Selected client and personal projects. Additional work samples: sreefolio.vercel.app/projects

SkelArmor Dashboard — Freelance SaaS Project

[Live](#) — [Docs](#)

- Collaborated directly with the client to analyze requirements and design tenant-based SaaS workflows
- Developed dashboard modules using React, Next.js, and TypeScript with role-based access control for multiple user roles
- Integrated APIs and managed asynchronous data handling for real-time dashboard operations

SkelArmor Platform — Freelance Full Stack Project

[Live](#)

- Gathered business requirements and contributed to developing a SaaS platform tailored to client needs
- Built responsive and SEO-friendly interfaces using Next.js with a focus on performance and maintainability
- Contributed to backend APIs, deployment workflows, and production server configuration

My3DUI — UI Component Library

[Live](#) — [Docs](#)

- Built reusable 3D UI components using React Three Fiber and TypeScript for interactive web applications
- Designed composable component architecture and custom hooks for reusable animation behavior
- Improved developer experience by abstracting complex 3D rendering logic into reusable UI primitives

Education

B.Sc. Computer Science

2022 – 2025

S.A. College of Arts & Science
